🤖 AI Features — Full Specification

Developer-Ready Functional Specification (Markdown)

Scope: AI Scheduling, AI Marketing, AI Recommendations, AI Retention, AI Content, AI Chat, AI Insights, AI Fraud/No-Show Prediction, Edge Cases

---

1. Overview

AI is a core differentiator of the platform.
It enhances:

- Booking experience
- Salon operations
- Client retention
- Marketing automation
- Personalization
- Discovery
- Fraud/no-show prevention

AI features must be:

- Invisible when appropriate
- Assistive, not intrusive
- Salon-controlled
- Privacy-safe
- Non-predatory
- Designed to increase revenue and reduce admin work

---

2. AI Feature Categories

1. **AI Scheduling Optimization**
2. **AI Marketing Automation**
3. **AI Client Retention Predictions**
4. **AI Service Recommendations**
5. **AI Content Creation**
6. **AI Chat Assistance (Salon + Client)**
7. **AI Insights & Analytics**
8. **AI No-Show & Fraud Prediction**
9. **AI Marketplace Personalization**

Each category is detailed below.

---

3. AI Scheduling Optimization

AI helps salons optimize their calendar to:

- Reduce gaps
- Increase revenue
- Improve staff utilization
- Suggest optimal times to clients

3.1 Client-Side Scheduling

When a client selects a service:

AI suggests:

- Best times based on salon availability
- Times that reduce gaps
- Times that match client history
- Times that match staff preferences

3.2 Salon-Side Scheduling

AI suggests:

- Optimal staff assignment
- Gap-filling opportunities
- Overbooking prevention
- Smart buffer times
- “High-demand hours”

3.3 Smart Rescheduling

If a client cancels:

- AI suggests best replacement slots
- AI suggests clients who may want that slot
- AI can auto-send “This time just opened up” messages

3.4 Edge Cases

- AI suggestions must never override salon rules
- AI must respect staff availability
- AI must avoid double-booking
- AI must not suggest times outside business hours

---

4. AI Marketing Automation

AI automates salon marketing across:

- SMS
- Email

- Push notifications
- In-app messages
- Social media content (optional)

4.1 Automated Campaign Types

AI can send:

- “Time to rebook” reminders
- “We miss you” messages
- “Your favorite service is available this week”
- “Your stylist has openings tomorrow”
- “Your membership is expiring soon”
- “Happy birthday” messages
- “New post from your salon”

4.2 Trigger Types

- Time-based
- Behavior-based
- Booking-based
- No-show-based
- Loyalty-based

4.3 Salon Controls

Salon can configure:

- Tone (friendly, professional, fun)
- Frequency
- Channels (SMS, email, push)
- Approval required or auto-send
- Templates

4.4 Edge Cases

- AI must not spam clients
- AI must respect opt-out preferences
- AI must not send messages outside allowed hours

---

5. AI Client Retention Predictions

AI predicts:

- Which clients are likely to churn
- Which clients are overdue for a visit
- Which clients need rebooking reminders
- Which clients respond to discounts

- Which clients prefer certain staff

5.1 Retention Dashboard

Shows:

- “At-risk clients”
- “Clients overdue for rebooking”
- “Clients likely to return soon”
- “Clients who respond to promotions”

5.2 Automated Actions

AI can:

- Send rebooking prompts
- Suggest personalized offers
- Notify salon staff
- Add clients to retention campaigns

5.3 Edge Cases

- Predictions must be explainable
- No “black box” decisions
- No discrimination or sensitive attribute inference

---

6. AI Service Recommendations

AI recommends services to clients based on:

- Past bookings
- Saved posts
- Style preferences
- Hair/skin type
- Seasonal trends
- Staff specialties

6.1 Client-Side Recommendations

Shown on:

- Salon profile
- Booking flow
- Marketplace feed
- Post view (“Book this look”)

6.2 Salon-Side Recommendations

AI suggests:

- Add-on services
- Upsells
- Packages
- Memberships

6.3 Edge Cases

- AI must not recommend unavailable services
- AI must respect salon pricing
- AI must avoid inappropriate suggestions

---

7. AI Content Creation

AI helps salons create:

- Captions
- Post descriptions
- Hashtags
- Service descriptions
- Policies
- Announcements
- Promotional messages
- Before/after storytelling

7.1 Content Inputs

Salon provides:

- Photo/video
- Short description
- Goal (promote service, educate, inspire)

AI generates:

- Captions
- Hashtags
- Titles
- Booking CTAs

7.2 Edge Cases

- AI must avoid medical claims
- AI must avoid sensitive topics
- AI must avoid copyrighted content

---

8. AI Chat Assistance

8.1 Client-Side Chat

AI can:

- Answer FAQs
- Provide service info
- Suggest services
- Provide pricing
- Provide availability
- Help with booking

8.2 Salon-Side Chat

AI can:

- Draft responses
- Suggest replies
- Auto-answer common questions
- Detect urgent messages
- Summarize long conversations

8.3 Escalation Rules

AI must escalate to human when:

- Client expresses dissatisfaction
- Client requests custom work
- Client requests medical advice
- AI is unsure

---

9. AI Insights & Analytics

AI provides insights such as:

- Best-performing services
- Best-performing posts
- Staff utilization
- Revenue predictions
- Peak booking times
- Client lifetime value
- No-show patterns

9.1 Insights Dashboard

Includes:

- Trends
- Predictions

- Recommendations
- Alerts

9.2 Edge Cases

- Insights must be anonymized
- No sensitive attribute inference

---

10. AI No-Show & Fraud Prediction

AI predicts:

- Likelihood of no-show
- Likelihood of late cancellation
- Fraudulent behavior patterns

10.1 Actions

AI can:

- Require deposit
- Require full prepayment
- Notify salon
- Suggest double confirmation

10.2 Edge Cases

- Must not discriminate
- Must not use sensitive attributes
- Must provide explainable reasoning

---

11. AI Marketplace Personalization

AI personalizes:

- Feed
- Search results
- Style recommendations
- Salon suggestions
- Post ranking

11.1 Signals Used

- Location
- Services viewed
- Posts liked/saved
- Booking history

- Style tags
- Budget
- Hair/skin type (optional)

11.2 Edge Cases

- No competitor injection on booking flow
- No predatory redirection
- No “similar salons near you” on salon profiles

---

12. Non-Functional Requirements

- AI responses must be < 1 second when possible
- All AI actions must be logged
- AI must be explainable
- AI must be overrideable by salon
- AI must respect privacy and opt-outs
- AI must not store sensitive data
- AI must not hallucinate pricing or policies
